PROFILE SUMMARY

A passionate and dedicated individual with a bachelor's degree in Electrical Engineering from Anna University, with a strong fascination for Information Technology. This interest led to the pursuit of additional training, culminating in the completion of a comprehensive MERN Full-Stack course. This experience bridges the background in engineering with the dynamic world of web development. Constantly seeking to expand knowledge and stay updated with the latest technologies, the goal is to contribute to environments that prioritize seamless coordination and collective success.
